

— 1 —

AI cannot be morally responsible

— only people can.

— 2 —

**Algorithmic bias is a design
choice, not a bug.**

**You cannot meaningfully consent
to surveillance you don't know is
happening.**

— 4 —

**An AI that never lies can still
deceive you.**

**The energy bill for AI is being
charged to the planet — without its
consent.**

**If an AI can suffer, we are already
guilty.**

— 7 —

**Transparency about how AI works
is a human right.**

**The most dangerous AI isn't the
one that wants to harm you — it's
the one that doesn't care.**

**No machine should have the
authority to decide that a human
being dies.**
